YASH JAGTAP

Software Engineer

Front End Developer with 1+ years of experience building websites and web applications using Python, Java, AngularJS and modern JavaScript tools/frameworks. Experienced in all stages of interface component design, from conception to final testing and deployment of web responsive applications.

Experience

2019 - Present

World Blazing Solutions I Pune,Maharashtra

Travel Blog

Building cross-browser compatible and websites, resulting in faster load time than industry average.

• Produced multiple visual elements of web applications by translating UI/UX design wireframes into code, producing high quality markup using Python, Django.

• Worked closely with an agile team of 10 members and provided end-to-end solutions for projects

PROJECTS

Service Provider Web Page

Developed official website of Assetcues. The website plays a vital role in enhancing the company's online presence, providing key details about products, services, and corporate identity.

Translated UI/UX design wireframes into clean and efficient code, producing high-quality markup using AngularJs, HTML5,CSS3.

Created responsive design to ensure compatibility with various devices and screen sizes.

Technologies Used :HTML5, CSS3, Bootstrap5, Javascript AngularJS.

CUSTOM CANDLE STRATEGY

Software that allows users to define ATM (At-The-Money) strikes based on adjust timings and durations. The software automates the process of buying hedges when deviates by 20 units from the ATM, optimizing margin utilization. It supports various customizable stop loss settings, and the option for re-entry, providing traders with a tool for their trading needs.

Technologies Used: Python

Rapido App

This Project of 24/7 Client where we have developed the application for our Fleet Driver & other automobile service distributor for purchasing the spare parts online . This project we would like to introduce a new idea which will deliver the product within a day for B2B as well as B2C business in the application.

Managed CRUD (Create, Read, Update, Delete) operations using RESTful APIs, enabling efficient data management and real time updates within the app.

Utilized HTML5, CSS3, and Bootstrap 5 to create a responsive design, ensuring seamless functionality on various devices and screen sizes.

Technologies Used HTML5, CSS3 Bootstrap5, AngularJS,Java.
